

Fundamentals of Oncology Acupuncture

Online Continuing Education Course - 12.5 NCCAOM PDA points

About the class

This interdisciplinary continuing education course provides acupuncturists with the knowledge to treat cancer-related side effects safely and effectively. You will learn scientifically-tested methods to care for cancer pain, fatigue, hot flashes, and neuropathy. Participants will also learn about cancer prevention, detection, and treatments, communicating with patients and families, and herb-drug interactions.

Price: \$396

a 20% discount for American Society of Acupuncturists (ASA) members only.

Limited time offer for ASA members only; discount available 12/17/18 to 2/17/19 only. One discount enrollment per member.

Educational objectives

- Describe how cancer staging affects treatment decisions and patient outcomes.
- Explain the contemporary science for acupuncture mechanisms of action.
- Discuss the palliative care approach to cancer pain and symptom management.
- Explain clinical approaches for treating cancer-related side effects with acupuncture.
- Create detailed acupuncture treatment plans for cancer-related side effects.
